

Commercial Roofing Project Roadmap

A Smarter Way to Plan Your Roofing Project

Most roofing issues aren't caused during installation. They start long before the first crew arrives.

This roadmap outlines the critical phases of a commercial roofing project so you can plan ahead, reduce risk, and protect your building throughout the process.

Next Steps

**Don't just replace your roof.
Plan it right.**

Walk through this roadmap with a Nations Roof expert and get a tailored plan for your building.

to Help!**

01

Roof Condition Assessment

Understand what you actually have before making decisions.

A clear assessment identifies current issues, remaining lifespan, and the right path forward.

02

Safety & Compliance Planning

Every project should be built around safety.

Proper planning protects your people, your property, and your operations from unnecessary risk.

03

Project Planning & Coordination

Align scope, schedule, and stakeholders early.

Strong planning reduces delays and keeps your project running smoothly from start to finish from unnecessary risk.

04

Material Staging & Site Protection

Where and how materials are handled matters.

Organized staging minimizes disruption and protects your building and surrounding areas.

05

System Installation & Quality Control

Execution determines performance.

Proper installation and oversight ensure your roof performs as designed for the long term.

06

Documentation & Project Closeout

Complete documentation provides clarity and accountability.

It also protects your warranty and gives you a clear record of work performed unnecessary risk.

07

Ongoing Maintenance & Lifecycle Planning

A roof is not a one-time project.

Ongoing inspections and maintenance help extend lifespan and prevent costly surprises.
