

Time to Retire Your Rooftop Solar?

We'll help you remove, recycle, and rebuild
— the right way.

Nations Roof and We Recycle Solar have partnered to offer the **only national, turnkey solution** for safely decommissioning rooftop solar systems and preparing facilities with the next generation of energy-efficient roofing — with certified crews, zero-landfill recycling, and full ESG reporting.

What Makes This Partnership Different

- Only EPA-permitted, dedicated recycler for solar panels in the U.S.
- Safe handling of hazardous materials and damaged modules
- Certified panel removal and chain-of-custody documentation
- Seamless coordination with roof replacement or repairs
- Full ESG reporting to support sustainability benchmarks
- Resale & remarketing path for functional modules
- Recycling up to 99% of all solar components including glass, metals, and rare materials.
- **One partner. One process.**

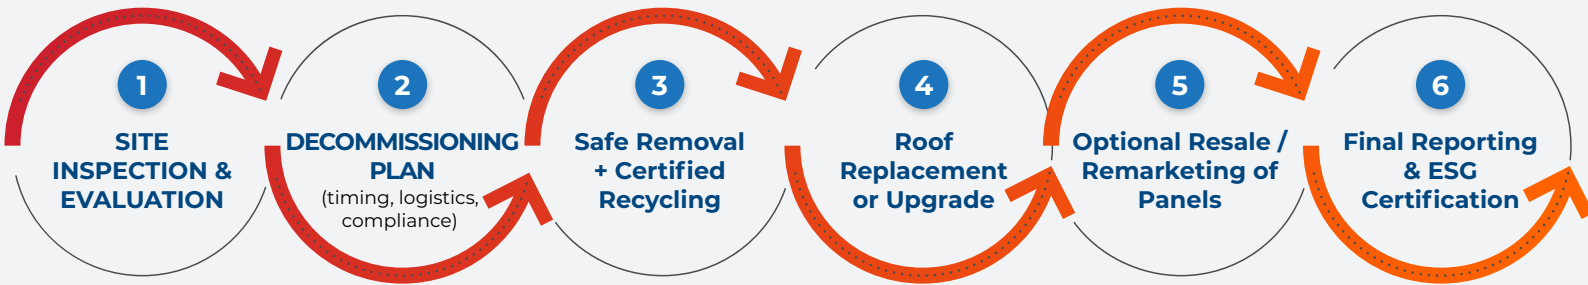

Is This Right For You?

- Facilities planning solar removal or roof replacement
- Aging or underperforming solar systems
- ESG or compliance-driven asset upgrades
- M&A, repositioning, or divestiture projects

How It Works

Simple. Safe. Certified. Six Steps from Decommissioning to Delivery.

Backed by Trusted Partners
